DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 9, 11-16, 45-48 and 50-52 drawn to a method of identifying a mammalian protease mutein wherein the target is as recited therein.
- II. Claims 53-54, 56-58, drawn to a method of identifying a protease mutein comprising the recited protease therein comprising steps (a)-(f).
- III. Claims 59-62, drawn to a method of identifying a human protease mutein employing the recited target and protease therein.
- IV. Claims 63-66, drawn to drawn to a method of identifying a human protease mutein employing the recited target and different species of proteases therein.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01)..

Art Unit: 1639

In the instant case the different inventions are drawn to different methods comprising different components and/or method steps. For example, the method of Group I relates to screening employing the different recited targets therein using any type of protease. Group II recites some species of the target and protease and includes additional steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Groups II-IV, specifically the literature searches, restriction for examination purposes as indicated is proper.

Claims 1, 7, 8, 12, 53, 59 and 63 are generic to a plurality of disclosed patentably distinct species comprising protease and target. Applicants are to elect a single species of a target, for example, tumor necrosis factor (see e.g., claim 63) and a single species of protease e.g., granzyme A or B or M or cathepsin as recited in e.g., claim 7.

Each of the species in each of the target and protease differs in structure, function, effects and mode of action. A prior art reference anticipating one species would not render obvious the other species.

Art Unit: 1639

Applicant is required under 35 U.S.C. 121 to elect a ***single disclosed species of a target and a protease, for examination purposes***, even though this requirement is traversed.

Applicant(s) is/are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant(s) will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant(s) must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the

Art Unit: 1639

inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
